

Paessler PRTG MultiBoard – Comprehensive overview of your enterprise monitoring environment

Designed for customers of Paessler PRTG Enterprise Monitor

Product overview

View all your PRTG servers at a glance and manage your monitoring centrally.

PRTG MultiBoard is an alternative interface that you can use to connect to PRTG Enterprise Monitor to configure your setup, view monitoring results, and keep an eye on your network. In addition to your PRTG Enterprise Monitor installation, you can add unlimited PRTG Network Monitor or PRTG Hosted Monitor instances. PRTG MultiBoard is available for Windows, Linux, and macOS.

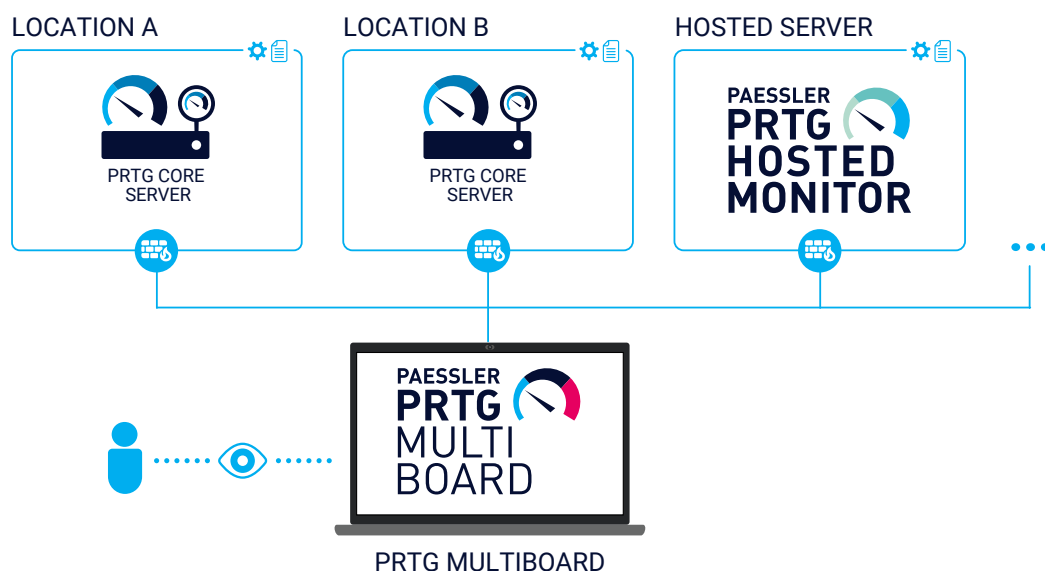

Target audience

- Sysadmins of enterprise environments and large infrastructures
- Prospects and customers of Paessler PRTG Enterprise Monitor

Our product extension PRTG MultiBoard offers:

- ✓ **Centralized monitoring** to view large IT infrastructures in a single pane of glass
- ✓ Increased **scaling & architectural flexibility** with an unlimited number of PRTG servers
- ✓ **Easier management** of distributed or heavily segmented environments

PRTG MultiBoard is exclusively bundled with PRTG Enterprise Monitor and **free of charge for a limited time only**. It is not available for PRTG Network Monitor or PRTG Hosted Monitor licenses.

Exclusive features / pain relievers

Multi Server

View data of all your independent PRTG servers at a glance and manage your monitoring centrally.

MultiBoard Dashboard

Choose between three different widgets for a high-level overview of selected PRTG servers or a detailed view of a single PRTG sensor.

MultiBoard Overview

Show all device trees in a single window. Quickly navigate through PRTG, inspect & edit multiple objects at once.

Probe Transfer

Copy PRTG remote probes from one PRTG system to another. Test configuration changes or distribute the workload over several probes.

How does PRTG MultiBoard differ from ITOps Board?

ITOps Board – also exclusively available for PRTG Enterprise Monitor – focuses on advanced analytics and business service-based SLA modeling and monitoring. It offers a business service-oriented view and creates dependency diagrams and automated incident workflows.

PRTG MultiBoard is an alternative interface that you can use to connect to PRTG Enterprise Monitor to configure your setup, view monitoring results across multiple PRTG servers, and transfer PRTG probe settings from one system to another.

You don't have a PRTG Enterprise Monitor license? We've got you covered!

For small and medium monitoring environments, the PRTG app for desktop is just what you need. See the product page with all the details:

<https://www.paessler.com/prtg-desktop>

Product overview

The PRTG app for desktop is an alternative interface that you can use to connect to a PRTG Network Monitor installation or a PRTG Hosted Monitor instance to configure your setup, view monitoring results, and keep an eye on your network.

Target audience

- Sysadmins in SMB monitoring environments who need to review and manage existing PRTG installations
- Customers with one or more PRTG Network Monitor installations or PRTG Hosted Monitor instances

Please note

- No Multi Server features as in PRTG MultiBoard
- No Probe Transfer and Configuration Viewer features
- No option to make changes to PRTG system settings
